Skull Base and Complex Microsurgery Fellowship

The Section of Skull Base Surgery (SSBS) works as an interdisciplinary team in conjunction with specialists in interventional neuroradiology, otolaryngology, neuro-ophthalmology and plastic surgery. The SSBS evaluates and treats a large number of patients with meningiomas, schwannomas, craniopharyngiomas, chordomas and other skull pathologies. In addition, the SSBS performs a large number of MVD procedures for trigeminal neuralgia and hemi-facial spasm and treats a large number of complex brain tumors.

The primary goal of this fellowship is to train future academic leaders and clinical scientists in the subspecialty of skull base surgery by providing advanced training in the overall management of patients with complex skull base pathology. During the fellowship year, the fellow will also actively participate in on-going clinical research in the areas of outcomes research, surgical technique refinement and elucidation of the natural history of meningiomas/schwannomas. The fellow will have access to a fully equipped, state of the art surgical anatomy lab.

Interested applicants must have successfully passed USMLE Steps 1, 2CK and 2CS. Applicants requesting an H-1B visa must also have successfully passed USMLE Step 3. International medical graduates must have received a currently valid ECFMG certificate in order to apply to our program.

Interested candidates can apply for a fellowship position by submitting the following documentation:

- Fellowship Application
- Curriculum Vitae (CV)
- Personal Statement
- Letter from Residency Program Director In lieu of Dean’s Letter
- At least two letters of recommendation from physicians whom have supervised you in a clinical setting
- USMLE/COMLEX Score Reports
- Medical School Diploma
- Certificate(s) of previous training
- Certified copy of your currently valid ECFMG certificate (applicable for International Medical Graduates only)
